### **Reasons for Allowance**

1. The following is an examiner's statement of reasons for allowance: None of the prior art of record alone or in combination teaches or fairly suggest applicant's claimed invention. Particularly, none of the prior art of record teaches applicant's independent claims 1, 7 and 16.

Claim 1 claims among other things "a light sensor for generating a timing signal in response to detecting light at approximately said second wavelength; and a controlled programmed to pulse said first light source between pulses of said second light source in response to said timing signal, and modify said first time period such that the second light source pulse occurs at  $T/2$  after said timing signal."

Claim 7 claims among other things "a light sensor for generating a timing signal in response to detecting light at approximately said second wavelength, said timing signal being indicative of another vehicle's second light source; and a controlled programmed to pulse said first light source in response to said timing signal such that the pulse is centered around a time delay of  $T$  seconds after said timing signal."

Claim 16 claims among other things "generating a timing signal in response to detecting light at approximately said second wavelength, said timing signal indicative of another vehicle's light source; and pulse activating said first light source in response to said timing signal at a duty cycle less than 50%, said first light source pulses at a delay of  $T$  seconds after said timing signal."

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
